

Bhavjot Khurana

Chicago, IL | bhavjotskhurana@gmail.com | LinkedIn | Github | Portfolio

EDUCATION

Reed College

Bachelor of Arts - Mathematics and Statistics

Activities: International Student Board Coordinator

Portland, Oregon

May 2023

WORK EXPERIENCE

Founder & Product Developer

VLTG – IBEW Aptitude Test Prep Platform (vltg.net, launching 2026)

Chicago, IL

2025 – Present

- Building an end-to-end diagnostic platform for electrical-trades apprentices: an adaptive assessment engine, a student-facing analytics dashboard, and an LLM “coach” summary (Claude Haiku API) with personalized next steps.
- Instrumenting a full-funnel acquisition test across three channels (TikTok, forums, Facebook), tracking landing-page-through-dashboard events to measure channel-level conversion at launch; owning the product lifecycle solo.

Data Analyst

Yuno Learning (Summer Internship, then intermittent freelance)

Remote

Summer 2022 – Aug 2025

- Queried and reshaped tutoring cohort data in SQL to deliver weekly trend snapshots and actionable recommendations for curriculum leads.
- Authored experiment readouts for A/B tests on content cadence and deadline expectations, applying t-tests and Cohen’s d across pre-, mid-, and post-course score distributions.
- Collaborated with the technical team on conversion-tracking dashboards, contributing data hygiene feedback and pinpointing where to capture signals from website visit through tutor match.

Private Tutor

Freelance

Chicago, IL

May 2024–Present

- Coach 7 students weekly across K-7 Math, SAT Math, and AP Calculus/Physics; raised one student’s SAT Math score from 580 to 730 in three months.
- Built and run scotchegg.co, a free 1,440-question SAT Math practice platform organized by topic that doubles as an acquisition funnel for my tutoring clients.

Mathematics & Statistics Tutor

Pear Deck Tutor (GoGuardian)

Remote

October 2023–March 2025

- Delivered 600+ one-on-one sessions (K-12 through college) across Algebra, Calculus, Probability, and Statistics, and designed Introductory Statistics and Probability curricula for non-traditional learners.

SELECTED PROJECTS

Predicting Student Proficiency in Oregon Public Schools

Senior Thesis

Portland, OR

August 2022–May 2023

- Curated a 1,236-school ESSA dataset and built random forest models in R (caret, randomForest, SMOTE, 9-fold CV) to predict ELA/Math proficiency, achieving over 80% accuracy for most cohorts.
- Delivered confusion-matrix and variable-importance readouts, highlighting staffing metrics as top predictive drivers.

A/B Testing Analysis – Advertising Experiment

Independent Project (Kaggle dataset)

December 2025

- Analyzed a large-scale advertising experiment to evaluate the impact of ad exposure on conversion, applying hypothesis testing and confidence intervals to separate real lift from noise.
- Assessed conversion efficiency against cost trade-offs to translate the statistical results into a clear go/no-go recommendation.

SKILLS

Analytics & Experimentation: A/B Testing, Hypothesis Testing, Funnel/Event Instrumentation, KPI Definition, Statistical Modeling

Languages & Tools: Python, R, SQL (MySQL/Postgres), Git, Supabase

Visualization: Python (matplotlib, seaborn, plotly), R (ggplot2), Tableau

Other: LLM API Integration (Anthropic Claude), Product Analytics
